 - **API Development:** RAML, REST, JSON, XML
 - **Connectors:** NetSuite, ADP, Workday, DB, Coupa, SFTP, HTTP, Object Store, MQ
 - **CI/CD:** GitHub, Jenkins, Maven
 - **Monitoring & Logging:** Log4J, CloudHub Monitoring
 - **Other Tools:** Postman, ServiceNow
 - **Cloud Platforms:** CloudHub, On-Prem, GCP BigQuery
 - **Version Control:** Git
 - **Operating System:** Windows
-

CERTIFICATIONS

- MuleSoft Certified Developer – Level 1 (October 2023)
 - Workato Automation Pro 1 (March 2024)
-

PROFESSIONAL EXPERIENCE

MuleSoft Developer

Ensocode Software Solutions, Pune

Sep 2024 – Present

- Designed and deployed MuleSoft APIs integrating ADP Workforce Now with Entra for onboarding automation and tax synchronization.
- Implemented real-time contract update integrations between Agiloft and NetSuite, improving operational efficiency.
- Developed DataWeave transformations across JSON, XML, and CSV for compliance-driven integrations.
- Managed CI/CD deployments on CloudHub with environment-specific configurations.
- Collaborated with ADP and NetSuite teams to validate workflows and test cases.
- Conducted production support activities including issue triage, RCA, and rollback strategies.
- Created robust error-handling frameworks with alerting via Slack/Email and correlation ID tracking.

MuleSoft Developer

CBL Solutions, Hyderabad

Jan 2023 – Aug 2024

- Developed and deployed REST APIs using Anypoint Platform; designed RAML specs in API Designer.
- Conducted requirement analysis, schema design, and security implementation for enterprise APIs.
- Integrated systems like SAP, Salesforce, and internal databases use Mule connectors.
- Designed and implemented CLEH (Common Logging Error Handler) framework for logging and incident automation.
- Migrated APIs from on-prem to cloud, replacing RabbitMQ with Anypoint MQ.
- Supported hypercare and post-go-live production monitoring and troubleshooting.
- Led best-practice documentation initiatives; contributions adopted as project standards.

MuleSoft

Entransys Pvt Ltd, Bengaluru

July 2020 – Dec 2022

- Gained hands-on experience with MuleSoft Anypoint Platform, working on both REST and SOAP integrations.
- Developed integrations between Salesforce, SAP, Oracle DB using standard Mule connectors.
- Built real-time and event-driven flows, leveraging MQ Series and SFTP transports.
- Configured email and ServiceNow connectors for proactive alerting and recovery.
- Designed starter templates and reusable components for internal accelerators.
