---

## **Objective**

To develop a career as an Integration Consultant in an esteemed organization where my skills and experience will be utilized in achieving the goals and objectives of the organization.

---

## **Career Summary**

- 7.6 years of overall experience in Information Technology with a strong background in Java and EAI tools.
- 6.6 years of hands-on experience in MuleSoft, with expertise in designing and developing integration solutions using API-led connectivity.
- Certified MCD – Level 1 (Mule 4).
- Proven experience in estimation, solution design, development, testing, production deployment, and support.
- Proficient in DataWeave, RAML, policy implementations (OAuth2.0, Rate limiting, IP blacklist), and reusable API components.
- Experienced in integrating systems using Azure services (ADF, App Services, Monitoring, Storage).
- Hands-on experience with MS SQL Server, including developing and optimizing Stored Procedures.
- Working experience in Python and C#.NET, implementing automation scripts and backend integration utilities.
- Exposure to Blazor Framework, Entity Framework, and LINQ in internal tools and POCs.
- Strong background in CI/CD with tools such as Maven, Jenkins, Azure DevOps, and Git.
- Experience with version control systems (SVN, GIT), and Agile Scrum methodologies.

- Certified in AZ-900 (Azure Fundamentals) and AZ-204 (Azure Developer Associate).
  - Certified Dell Boomi Associate and Professional Developer.
  - Excellent communication and client-interaction skills; experience in team coordination and offshore collaboration.
  - Awarded “SPOT” for performance excellence.
- 

## **Technical Skills**

- EAI Tools: MuleSoft Anypoint Studio (4.x.x), Mule Runtime, Azure Data Factory, Dell Boomi, Workato
  - Languages: Java, Python, C#.NET, Blazor
  - Databases: MS SQL Server (incl. Stored Procedures), Oracle, MongoDB, SQL Developer
  - Web Services: REST, SOAP
  - Cloud & DevOps: Azure (App Services, ADF, Monitoring, Storage), Azure DevOps, Jenkins, Maven
  - Frameworks: Entity Framework, LINQ, Blazor (basic-level usage)
  - Version Control: GIT, SVN
  - Testing Tools: Postman, JMeter, MUnit, SOAP-UI
  - Others: JDBC Adapter, MongoDB Compass, Windows, UNIX
- 

## **Academic Qualification**

- B.Tech in Computer Science and Engineering – Jawaharlal Nehru Technological University (2016)
-

## **Professional Work Experience**

### **Publicis Sapient, Hyderabad**

Senior Associate Technology L1

June 2023 – Present

Client: SUNBELT, US

Team Size: 30

Responsibilities:

- Analyzed requirements and provided integration solutions with estimations.
  - Conducted discussions with clients and stakeholders to define architecture.
  - Developed APIs using MuleSoft and deployed using Azure DevOps pipelines.
  - Created reusable components and practiced API-led connectivity.
  - Participated in peer code reviews, performed unit and system testing.
  - Supported production releases and CI/CD integration.
- 

### **TEKsystems, Hyderabad**

Sr Software Engineer

March 2020 – June 2023

**Client**

**: Ahold Delhaize Ltd, Netherlands**

July 2022 – June 2023

- Designed and developed APIs deployed on Azure Kubernetes Services, OpenShift, CloudHub, and on-prem workers.
- Implemented SQL Server logic using Stored Procedures for backend data operations.

- Wrote Python scripts for ETL automation and log management.
- Developed backend utilities using C#.NET and experimented with Blazor for internal dashboard visualization.
- Used LINQ and Entity Framework for data querying and management.
- Created RAML specifications, CI/CD pipelines in Azure DevOps, and managed deployments.
- Practiced API-led connectivity and integrated MuleSoft with other services.

#### **Client**

**: Cord Blood Registry (CBR)**

March 2020 – July 2022

- Built and maintained MuleSoft APIs and reusable assets.
- Integrated systems with Azure App Insights and various Azure services.
- Handled production support and troubleshooting.
- Developed SQL queries and stored procedures for backend reporting.

---

#### **EAIESB Software Solutions Pvt Ltd, Hyderabad**

Programmer Analyst

Jan 2018 – Mar 2020

#### **Project**

**: Tire Hub (Migration Mule 3 to Mule 4)**

Jul 2019 – Mar 2020

- Migrated legacy Mule 3 applications to Mule 4.
- Implemented API policies and RAML specifications.

- Integrated with Azure services and created MUnit tests with 75%+ coverage.
- Built custom connectors and reusable utilities.

## **Project**

**: e-Pragati, Andhra Pradesh**

Jun 2018 – Jun 2019

- Developed Common Logging and Error Handling Framework (CLE) using Spring Boot, JPA, and integrated it with MuleSoft.
- Worked on dashboards using Blazor (POC) for internal performance monitoring tools.

---

## **Certifications**

- MCD – Integration and API Associate (MuleSoft Certified Developer Level 1 – Mule 4)
- Dell Boomi Associate and Professional Developer
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Developer Associate (AZ-204)
