

LAKSHMI VASAVI BHUMA
Mobile No: +91 9182815502
Email Id: vasavibhuma7@gmail.com

Career Objective:

To secure a challenging position where I can effectively utilize and contribute my skills and abilities to an organization that offers professional growth while being resourceful, innovative and flexible thereby broadening the vistas of my mind and horizons of life.

Professional Experience:

- I have overall **5.6 years** of experience as a **MuleSoft Certified Developer** in designing, developing, and deploying MuleSoft applications using Anypoint Studio, API Manager, Runtime Manager and CloudHub.
- Proficient in MuleSoft's core components, DataWeave, Routers, Scopes, and connectors.
- Expertise in API-led connectivity, RESTful web services, SOAP, and data transformations using various formats like XML, JSON, and CSV.
- Strong understanding of integration patterns like message routing, and error handling.
- Experience in using various connectors like HTTP, File, Database and others to integrate with different systems.
- Working Experience with implementing OAuth 2.0 for API authentication and authorization, knowledge of security policies and managing API keys.
- Implementing batch processing jobs using Mule 4, scheduling, exception handling, and monitoring.
- Hands-on experience with Agile methodologies and CI/CD pipelines using tool Teamcity.
- Experience with troubleshooting and debugging Mule applications, performance tuning and optimization.
- Working experience with writing unit tests for Mule flows using munit.
- Contributed to the development and maintenance of API specifications and documentation.
- Passionate about staying current with the latest MuleSoft features, best practices, and industry trends.

Educational Qualification:

| Degree | College / University | Year of Passing |
|---------------|----------------------|-----------------|
| B. Tech (ECE) | RISE (JNTUK) | 2018 |

Experience:

| Organization | Designation | Duration |
|-----------------------|-------------------|----------|
| HCL Technologies Ltd. | Software Engineer | November |

| | | |
|----------------------------|-----------------|----------------------------|
| | | 2019 to Mar 2022 |
| Tata Consultancy Services. | System Engineer | April 2022 to January 2025 |
| ValueLabs Solutions. | Senior Analyst | January 2025 to till now |

Skills:

| | |
|------------------------------|-------------------------------------|
| Database | Oracle |
| Tools | Anypoint Platform, Studio, Exchange |
| Programming Language | Datawave , Sql |
| Operating System/Servers | Windows, Linux, Server/Unix |
| Ticketing Tools & Repository | Winscp, Jira, Bit bucket |

Certifications:

Certified MuleSoft Developer - Level 1

Project Summary:**#Project3**

Client : iSelect (Valuelabs)
Duration : January 2025 - till now
Environment : Mule 4, Anypoint Platform, Anypoint Studio, Jira

Project Description:

The iSelect project is focused on supporting various verticals within the insurance domain such as Pet, Energy, and Health and Travel Insurance.

MuleSoft is used as middleware to integrate and manage APIs across these verticals. The project also involves supporting clients, performing enhancements, maintaining flow documentation, and assisting with AWS cloud migration for improved scalability and performance.

Roles and Responsibilities:

- Developed and maintained APIs to support various insurance verticals (Pet, Energy, Health, Travel) using MuleSoft as middleware.
- Provided L2/L3 support for clients by resolving issues, monitoring API health, and ensuring seamless data integration.
- Worked on enhancements like adding new fields to existing APIs based on evolving business requirements.
- Played a key role in the AWS migration of MuleSoft services, assisting in deployment and troubleshooting in the cloud environment.
- Authored and maintained detailed technical documentation of integration flows to ensure transparency and ease of knowledge transfer.
- Collaborated with QA, DevOps, and business teams to deliver high-quality solutions and timely issue resolution.

#Project2

Client : Bank of America
Duration : April 2022 January 2025
Environment : Mule 4, Anypoint Platform, Anypoint Studio, Anypoint Exchange and Insomnia

Project Description :

The IHoliday systems project aimed to integrate bank transactions and account information between customers and their financial institutions. This application served as a central hub for all transaction-related data, facilitating seamless communication and data exchange. MuleSoft was utilized as the integration platform to orchestrate and manage the data flow between various systems and services involved in the financial transactions ecosystem.

#Project1

Client : Deutsche Bank

Duration : November 2019 – March 2022

Environment: Mule 4, Anypoint Platform, Anypoint Studio, Anypoint Exchange and Jira

Project Description:

DBSmart, a bank-critical project, was used to integrate bank transactions, statements, account information between customers and the bank, and trade information. MuleSoft was extensively used for this integration. The project involved integrating with external customers over SFTP, HTTP, and MQ. The data had to be transferred reliably within the agreed SLA, with a backup plan in case of failures.

Roles and Responsibilities:

- Involved in all phases of the SDLC from analysis, designing, developing, deploying, testing, and maintenance with timely delivery against aggressive deadlines.
- Collaborated with architects and business stakeholders to understand integration requirements and translate them into technical designs.
- Designed and developed API specifications using RAML.
- Defined integration patterns and best practices for optimal performance and scalability.
- Participated in code reviews and provided constructive feedback to junior developers.
- Developed and implemented integration flows using MuleSoft Anypoint Studio, code components like routers, endpoints and error handlers.
- Utilized DataWeave for data transformation and manipulation.
- Integrated with various cloud-based systems using connectors and APIs.
- Strong proficiency in Runtime Manager, API Manager, and other MuleSoft components.
- Experienced with RESTful APIs, file systems, databases, and other common integration technologies.
- Working Experience with implementing OAuth for API authentication and authorization, understanding of security policies and managing API keys.
- Performed unit testing, integration testing, and end-to-end testing of integration flows.
- Monitoring application performance and identified areas of improvement.
- Deployed and managed MuleSoft applications in various environments.
- Provided technical support and troubleshooting for production issues.
- Worked closely with business analysts to ensure successful project delivery and participated in knowledge sharing and best practices within the team.
- Implementing batch processing jobs using Mule 4, scheduling, exception handling, and monitoring.
- Hands-on experience with Agile methodologies and CI/CD pipelines using tool Teamcity.
- Ability to analyze complex problems and identify effective solutions and to understand needs of business stakeholders.

Declaration:

I hereby declare that all information furnished above is true to the best of my knowledge.
