## Angular/.NET Core/ MVC DEVELOPMENT PROFESSIONAL

Seeking a challenging technical assignment in **Software development based on .NET/MVC/Angular environment** across IT Industry while aiming for personal, professional as well as organizational goals.

---

### Summary Of Skills

- 10+ years of experience with Microsoft technologies for analysis, designing, implementing, and maintaining web applications.
  - Having experience in front end technologies like **ReactJs, Angular 8+, Vue JS, JavaScript, jQuery, HTML5 and Bootstrap** which is used for Front end development of application.
  - Hand on experience in **MVC, C#, WCF, ASP.Net, Entity Framework, Web API, NodeJS Services, Net Core Micro Services, Azure Durable Function.**
  - Knowledge of database technology like **SQL Server, MySQL.**
  - Experience on CI/CD integration of **GIT, TFS, Azure DevOps and SVN.**
  - Having Good knowledge for Database like as defining database structure, creating tables, for storing data, implementing stored procedures, functions for getting data form tables as per requirement of application with performance.
- 

### Technical Skills

Programming Language	<b>C, C++, Net Framework 2.0/3.5/4.0/4.5, C#, Entity Framework, Asp.Net</b>
Database	<b>MS SQL Server, MySQL</b>
Front End Technology	<b>ReactJs, Angular 4/6/7, VueJs, JavaScript, jQuery, HTML5, Bootstrap</b>
Web Technology	<b>MVC 3/4/5, ASP.NET, C#, MVC, Web API, NodeJS REST Service, Net Core, Microservice</b>
Other Tools	<b>Bit Bucket, JIRA, Git, VS 2008/12/15/17, VS Code, SVN, Azure DevOps</b>

### PROFESSIONAL EXPERIENCE

---

Currently Working as a Senior Software Engineer in **Civica Resource PVT LTD** from May 2022 to Till Date.

Previously Worked as Software Engineer In **eClinicalWorks India PVT LTD** From August 2020 to May 2022.

Previously worked as Software Engineer in **Collabera Technologies PVT LTD** From April 2019 to August 2020.

Previously worked as a Technical Analyst in **Priya Softweb Solution PVT LTD** from October 2017 to March 2019.

Previously Worked as a Web application developer in **Squad Technologies PVT LTD** From December

2014 to September 2017.

## PROJECT DETAILS:

---

### **Title: DD (Doc Distro)**

**Description:** DD is responsible for processing the document and if there is any error then resolved that error of document. It also displays the information of a document where it's come from and display the history of the document.

**Language:** ReactJs, .Net Core Rest API, Sql Server, Entity Framework.

### **Title: EONI Xpress**

**Description:** An Election Management System (EMS) is a software solution that streamlines the administration of elections by managing elector registration, candidate nominations, voting processes, premises management, and ballot box management. It ensures accuracy, security, and transparency throughout the entire electoral process.

**Languages/Methodology:** .Net Core, Web Api, C#, Sql Server, Entity Framework, Azure durable function, Angular, Agile.

### **Title: HMIS (Hospital Management Information System)**

**Description:** It's a comprehensive software solution designed to streamline and manage various administrative, financial, and clinical tasks within a healthcare facility.

**Languages/Methodology:** C#, Asp.Net, MVC, SSIS, SSRS, JavaScript, jQuery, MongoDB, ABP Framework.

### **Title: LexisNexis**

**Description:** we are scraping data from websites and store data in our database for maintaining criminal record. In the project we have three-part GOGI (Go get it), GOPI (Parser) and LCP.

**Languages/Methodology:** python, C#, and SQL Server

### **Title: Collabera Management System (CMS)**

**Description:** CMS manages the information of client and manager. When manager contact to any client in CMS it is added as a temporary after completion of all the process it moves to the hire craft and client become a permanent client of Collabera. Afterward the manager adds the request of the client. It also maintains the information of when the manager calls a client and by which medium is used for communication.

- Responsible for understanding requirements and development.
- Co-ordination with team and delegate responsibilities.

### **CI/CD Tools:** Azure DevOps

**Languages/Methodology:** Scrum Methodology, ReactJs, Bootstrap, Net Core Micro service, Azure Functions, SQL CLR, Entity Framework, RabbitMQ/Mass transit.

### **Title: One Console (T-Mobile)**

**Description:** One Console is an Operations tool that aggregates data to support targeted workflows across the Technology organization. The data displayed in One Console is leveraged across different workflows of Technology groups and interacts directly with Pier. One Console is agile in providing a uniform means for users to identify, interact, communicate, and resolve issues for the customer.

One Console is extremely customizable. The widget screen can be divided into one or multiple quadrants: sideways, and up-and-down. Widgets can exist singularly or be stacked in any quadrant. Any layout may be saved as your default. Each profile may have a different default layout.

- Responsible for understanding requirements and development.

- Work with Team and fulfill the requirement.

**CI/CD Tools:** Bit Bucket, Bamboo

**Languages/Methodology:** Scrum Methodology, VueJs, Angular 6, HTML 5, Bootstrap, Net Core Web API, Jira.

**Title:** Authentix

**Description:** Authentix is web application about the program which is conducted by authentix in which authentix user can be able to access all the program and the other user can be able to access the program which is related to that user. Implement Azure AD for the login. Authentix users can only create the program, not any other user has access to create program.

- Responsible for understanding requirements and development.
- Work with Team and fulfill the requirement.
- Attending internal meetings with team.

**CI/CD Tools:** Bit Bucket

**Languages / Methodology:** Scrum Methodology, Angular 6, HTML 5, Bootstrap, .Net Core Web API, Jira.

**Title:** Tamkeen

**Description:** Tamkeen is a semi-government base organization which provides financial support to individuals, enterprises, training providers and vendors to start their business. The main feature of the project is the Individual, enterprise and training provider program in which individual and enterprise users submit their application and Tamkeen will provide the finance to the user based on their requirement and their criteria.

- Deriving Complex tasks in simpler manner and implement it successfully.
- Responsible for Development, UI Design
- Helping team members to resolve any issue related to development.
- Provided support for any issues and defects in the application.

**CI/CD Tools:** SVN

**Languages/Methodology:** Agile Methodology, Angular 4, .Net MVC, SQL Server, HTML 5, Bootstrap.

**Title:** NDC Student Information System

**Description:** NDC (National Defense College) SIS basically manages the student information. The main feature is to manage the student information as well as It will allow user to submit their application from NDC staff schedule the appointment of the student and generate the report of student and based on the staff evaluation student get the information.

- Responsible for achieving the desired code coverage with the unit and integration testing.
- Develop application code and modules for business and technical requirements.
- Provided support for any issues and defects in the application.

**CI/CD Tools:** SVN

**Languages/Methodology:** Agile Methodology, .Net MVC, SQL Server, HTML 5, Bootstrap, jQuery, JavaScript.

**Title:** Bahrain Bourse

**Description:** Create framework of an application to display the information regarding share market price and display the information about upcoming news, event, marketing message Publication

- Responsible for achieving the desired code coverage with the unit and integration testing.
- Achieved application performance by re factoring query optimization and code standardization.
- Responsible for deployment in various environments TEST, SYST and PROD

**CI/CD Tools:** SVN

**Languages/Methodology:** Agile Methodology, .Net MVC, Web API, Entity Framework, SQL Server 2012, jQuery, JavaScript

**Title:** Uptown Mirdiff

**Description:** UPTOWN Mir diff is a Mall. Main feature is to manage the news, event and offer which is available inside a mall store. We have created a back end to store the information of mall like events, news and offers and display it in front.

- Requirement analysis, scope identification.
- Reporting status to Client and Management on regular basis.

**CI/CD Tools:** SVN

**Languages/Methodology:** Agile Methodology, ASP.NET, SQL Server, jQuery, JavaScript, HTML5, Bootstrap
