Work Experience:

Project: Court Management System

Role: Full Stack Developer

Technologies Used: .NET Core, React.js, SQL Server, AWS Lambda, S3, EC2

Responsibilities:

- Engaged in requirement analysis and implementation of a scalable web application using **React JS** and **.NET Core 9.0**. Improved and maintained application components following **MVC architecture**, leveraging **Visual Studio 2022, C#, and SQL Server 2022**.
- Accomplish **Repository Pattern** to promote clean separation of concerns and improve maintainability.
- **Agile software development** practices including sprint planning, daily stand-ups, and iterative delivery cycles. Ensured quality through unit testing, reviews, and adherence to **SOLID principles**.

Project: Employee Management Application

Role: Full Stack Developer

Technologies Used: .NET Core, Blazor, Restful API, SQL Server

Responsibilities:

- Engineered modular components and applied repository pattern architecture to streamline data operations and improve scalability.
- Assisting in agile software development management activities to respond to the unpredictability through iterative sprints & use Net core 7.0 for the development of the application. Utilized **Visual Studio 2022** for coding, debugging, and performance optimization across application layers.
- Ensured maintainable and testable code through unit testing, adherence to **SOLID principles**, and active participation in peer code reviews. Provided post-deployment support and enhancements based on user feedback and evolving business requirements.

Project: Education Management Application

Role: Full Stack Developer

Technologies Used: .NET Core, MVC, Restful API, SQL Server

Responsibilities:

- Contributed to **Agile development cycles**, utilizing that for iterative feature delivery and sprint-based planning. Integrated **RESTful APIs** within the MVC framework to enable dynamic user interactions and backend communication.
- Implemented **Repository Pattern** with **JWT authentication** to ensure secure and maintainable structure.
- Built robust **Data Access Layer (DAL)** and **Business Logic Layer (BLL)** using **C#, Entity Framework**.
- Provided post-deployment support and enhancements based on user feedback and evolving business requirements.

Project: Travel Booking Management Application

Role: Full Stack Developer

Technologies Used: .NET Core, MVC, Razor Page, SQL Server

Responsibilities:

- Implemented **role-based access control (RBAC)** within the ASP.NET MVC framework to manage user authorization and restrict access to sensitive application modules with defined roles and permissions.
- Collaborated in **Agile development** processes including sprint planning, iterative delivery, and backlog grooming. Took part in the full **Software Development Life Cycle (SDLC)** including documentation, system development, and deployment.
- Designed responsive and distributed web applications using **ASP.NET MVC 5.0, .NET Core Razor Pages 5.0**, and Visual Studio 2017. Conducted unit testing, reviews, and performance tuning to ensure application reliability and maintainability.

Project: MLM Management Application

Role: Full Stack Developer

Technologies Used: .NET Framework, MVC, HTML, CSS, JS, SQL Server

Responsibilities:

- Dynamic web pages and client-side functionality using HTML, CSS, Bootstrap, and JavaScript. Developed and optimized presentation layer components using ASP.NET to deliver responsive, user-centric interfaces and improve overall application usability.
- Optimized page layouts and enhanced usability user feedback and best practices. Participated in requirement analysis, coding, and implementation using **ASP.NET MVC 4 & MVC 5** frameworks.
- Migrated legacy systems to **MVC architecture**, ensuring separation of concerns and refined maintainability. Contributed to architectural pattern and development of functional specifications for enterprise web applications.
