- ❑ AWS , Hybris OCC, DevOps/MLOps

April 2019 – August 2022

Project : Fashion Rental
Role : SAP Hybris developer
Company : Wipro
Team Size : 10
Tools : Spring, Java, SAP Hybris commerce

Description:

This project involved designing and implementing a scalable **Fashion Rental e-commerce platform** leveraging **SAP Commerce Cloud (Hybris)**, integrated with **SAP S/4HANA** via **SAP Cloud Platform Integration (CPI)** to manage product replication, order fulfillment, and customer data synchronization.

The platform enabled customers to **rent fashion products online**, schedule deliveries and returns, and manage subscriptions, supporting omni-channel engagement and real-time inventory visibility.

Responsibilities:

- ☐ **Launch a** subscription-based fashion rental service **with flexible rental periods**
- ☐ **Integrate S/4HANA for** master data, order management, and inventory control
- ☐ **Provide** personalized recommendations **and dynamic pricing**
- ☐ **Enable seamless end-to-end processes spanning** product catalog, order lifecycle, and customer management

October 2018 – March 2019

Project : Indiska
Role : SAP Hybris developer
Company : **Aspire systems**
Team Size : 10
Tools : Spring, Java, SAP Hybris commerce

Description:

Indiska – A Swedish retail chain offering fashion, accessories, and home décor with a Nordic and Indian fusion aesthetic.

This project involved the end-to-end implementation and customization of the **SAP Hybris Commerce (SAP Commerce Cloud)** platform to support **Indiska's digital transformation** into a modern, customer-centric, omni-channel retailer.

The primary goal was to replace legacy systems with a unified commerce platform that could support scalable **B2C operations**, enhance **customer experience**, and integrate **online and offline** touchpoints including **store inventory, ERP, CRM, and POS systems**.

Responsibilities:

- ☐ Created and maintained **multi-level product catalogs**, categories, and classification attributes
Catalog Management & Product Data
- ☐ Established **approval workflows** for product enrichment and publishing Configured classification attributes and custom facets to support advanced product search and filtering.
- ☐ Implemented **variant products** (e.g., size, color) with dynamic pricing and availability
- ☐ Implemented dynamic catalog versioning and approval workflows for product managers.

October 2017 – August 2018

Project : Lumileds
Role : SAP Hybris developer
Company : **NTT Data**
Team Size : 10
Tools : Spring, Java, SAP Hybris commerce

Description:

Lumileds is a global leader in **light engine technology**, originally part of Philips and headquartered in the Netherlands. The company designs, develops, and manufactures **LEDs and automotive lighting solutions** used by businesses worldwide.

Responsibilities:

- ❑ Gathered business requirements from Lumileds stakeholders across EMEA and APAC regions.
- ❑ Designed end-to-end B2B commerce architecture integrating SAP Hybris Commerce with SAP ERP (ECC/S4).
- ❑ Defined user journeys for corporate buyers, distributors, and internal sales teams.

Catalog Management & Product Data

- ❑ Modelled multi-level product catalogs for professional lighting equipment (e.g., LEDs, modules, drivers).
- ❑ Configured classification attributes and custom facets to support advanced product search and filtering.
- ❑ Implemented dynamic catalog versioning and approval workflows for product managers.

B2B Customer Organization Setup

- ❑ Configured B2B unit hierarchies to represent distributors, wholesalers, and OEM customers.
- ❑ Defined company accounts, user roles, and permissions for buyers, approvers, and administrators.
- ❑ Enabled self-registration and account approval workflows.

Quote & Order Management

- ❑ Customized quote request and negotiation flows to allow corporate customers to request pricing.
- ❑ Integrated order processing with SAP backend via Data Hub/SCPI for real-time inventory and pricing.
- ❑ Configured replenishment orders and order templates for recurring purchases.
