Job Title: MuleSoft Developer
Experience Required: 5 Years
Employment Type: Contract (Remote)
Rate: $14 USD/hour

Job Description:

We are seeking a highly skilled **MuleSoft Developer** with 5 years of hands-on experience in designing, developing, and deploying integration solutions using the MuleSoft Anypoint Platform. The ideal candidate will have a strong background in system integrations, API development, and troubleshooting across various systems and environments.

Key Responsibilities:

- Design, build, and maintain scalable MuleSoft APIs and integrations

- Develop reusable assets, connectors, and integration components

- Collaborate with cross-functional teams to understand business requirements and implement solutions

- Ensure performance, security, and scalability of APIs and services

- Troubleshoot and debug integration issues efficiently

- Document integration processes, technical designs, and workflows

Requirements:

- 5 years of hands-on MuleSoft development experience

- Strong understanding of API-led connectivity and the MuleSoft Anypoint Platform

- Proficient in DataWeave, RAML, and API design

- Experience with CI/CD pipelines, version control, and automated deployment

- Knowledge of error handling, logging, and monitoring in MuleSoft

- Strong communication and problem-solving skills

- MuleSoft Certification (preferred but not mandatory)
