Job Title: C4E Hybris Backend Developer
Location: Hyderabad, Hi-Tech city (On-site)
Budget: 20 LPA
Experience: 10 Yrs
Contract: 1 Yr

Required Skills & Experience:
10 years of experience in Hybris (SAP Commerce) backend development.
Strong expertise in Java, Spring, REST APIs, and Microservices architecture.
Experience with Hybris OCC (Omni Commerce Connect) and service layer.
Hands-on knowledge of SAP Commerce extensions, workflows, and data models.
Familiarity with CI/CD pipelines, version control (Git/Bitbucket), and agile delivery models.
Exposure to C4E concepts—reusable assets, governance, and enablement frameworks.
Experience with SQL/NoSQL databases (e.g., MySQL, Oracle, MongoDB).
Strong debugging, problem-solving, and performance tuning skills.

Preferred Qualifications:
Knowledge of cloud deployments (AWS/Azure/GCP) for Hybris solutions.
Experience with integration tools (SAP PI/PO, MuleSoft, Kafka, or other middleware).
Familiarity with DevOps/MLOps practices within an enterprise setup.
Previous experience in a C4E team setup or enablement role is a plus
